

Fast. Flexible. Precise.

Customized prototypes are created using cutting-edge technology — efficiently, cost-effectively, and with the highest quality, whether for small series, pre-series, or end-of-life series.

Innovative Prototype Manufacturing for your Industry

Automotive

Body and structural components, crash and safety parts

Agricultural

Durable formed parts for agricultural machinery and special vehicles

Defense

Protective and structural components for military applications

Your Benefits

- ✓ **Fast execution** – Short development times
- ✓ **Flexibility** - Customized solutions
- ✓ **Precision** - Cutting-edge manufacturing technologies
- ✓ **Material diversity** – Steel, aluminum, high-tech materials
- ✓ **All-in-one** – Development, testing, optimization
